LEATHER, ART AND CRAFT.

PRICE: NK.kr. 50, EURO 8, US \$ 9

NR. 2

PUBLISHED BY: BLADET LÆRSKO OG SKINN FORLAG

2013

Shoulder bag, with appliqué face, a work by: Kari Merethe Buseth, Norway

**EDITORS NOTICE.**

For the first time comes The Euro\*pean Leather, Shoe and Hide complete made on a computer. It's the hope that it will be a better journal out of it than in the "the old days" when it was made as a copying magazine, glued together. It has as the other issues 16 pages and an appendix. The greatest difference will probably be that the glue marks have disappeared.

**Ivan Basic '8' Tool Set.**

Ivan '8' Basic Tool Set is gone over to be called Ivan Basic 'Seven' Tool Set. It's not only the name as is changed from '8' to 'seven'. But the tools have also been considerable improved with more fineness in the execution, something as make them less 'lumpy' than the first type of set they made from the 1980's and forward. Else it's the same number of tools in the set. The reason to the change of name is in accordance to the factory that the screwdriver not longer is consider as a tool(punching tool!).

Jørn Jensen Lærhandel on Lillestrøm, Norway; moves in the second quarter 2014 (April/May) to their own new building on Rælingen. It means that travellers as come to Lillestrøm by train must take bus from Lillestrøm to Rælingen. Just a short tour and the bus stop is just beside the new location. Else it's a 20 minutes walk. In the change will the shops both on Lillestrøm and Rælingen be open. (The magazine hope to bring a mention of the new place in No.1-2014).

Alf's Skinn og Lærverksted held a beginners course, in tooling on Plus-Skolen in Fredrikstad, Norway, from 21-24 of October, 2013

## Word about Book

Book : King of the Western Saddle

*The Sheridan Saddle and the Art of Don King*

Author: Timothy H. Evans

Publishing Firm: University Press of Mississippi, Jackson

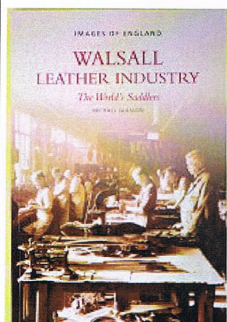

Publishing Year: 1998

ISBN: 0-87805-809-5

Language: English

It begin to be some years since this book was published. But it's still telling enough about the central person, Donald L. King in the development of the now famous and well known Sheridan style what concern as well the saddle as the tooling style. The book take us with on a journey from Donald L King childhood and youth when he travelled around from one ranch to the other together with his father and worked. Already 12 years old shutter and teamed he horses – and was become known with rawhide braiding- And he began 15 years old to hang around a famous saddle shop in Phoenix, named Porter's Saddlery. Where he became known with a other youngster, Cliff Ketchum, as teachd him about tooling. The rest is a history as the book hide between its 72 pages. You could say it was to few. But in any case begins it with a preface. And continue further with a chapter as have a survey about the development of the western saddle illustrated with drawings by Verlane Desgrange. Further a chapter about decoration, about style, and saddle workshops. The next 10 chapters is about Donald L . King and the development of a saddle and tooling style. Near the end it's a good literature list as lead further into American leather craft, art and culture and as is used as source to the book. And in the end is it about 20 pages with colour photos as underpins the text several places during the reading. The book is among others possible to buy on Amazon internet shop.

## Word about Book

Book : Walsall Leather Industry

*The world's saddlers*

Author : Michael Glasson

Publishing Firm: Tempus Publishing

Publishing year : 2003 (reprinted in 2009 by The History Press. And in 2011.)

ISBN : 978 0 7524 2793 5

Language : English

It's possible to buy this book on the Walsall Leather Museums web page. And on Amazon Book . The content is about the leather industry in the town Walsall in England. Its “modern” history is about 200 years. But the tanning industry is older. The book have a subtitle “ The World's Saddlers”. And that tells the most about this history as is between the covers. It have 7 chapters on 130 pages. It's a picture/photo book and all together give the photos a diverse impression, impressive to see the, but you can not either avoid to be surprised by understanding how much of the hand craft as survived in this industry , all the way up to our days – when you study the photos – as is good substantiated with texts, so that you can orient you quite easy. This surprise comes also by thought on the industrial revolution, and that leads also to the only strange matter for the under signer by reading this book. It is about the absence (mentions??) of unions in the Walsall Leather Industry. Particular when you read in the section “Working Conditions” are you thinking on it.

(Else have this issue a article and photos from this museum on page 6-7.)
